DETAILED ACTION

Allowable Subject Matter

1. **Claims 12-24** are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claim 12**, the present application teaches a radio telephone including a recharging power supply and having coupling means for connecting to a charging unit for charging the rechargeable power supply, the radio telephone comprising sensing means associated with the coupling means and operable to sense the absence or the presence of the charging unit being connected to the radio telephone, and inhibiting means configured to be responsive to the sensing means in such a manner that when the sensing means sense absence of the charging unit the inhibiting means automatically inhibits operation of the radio telephone as specifically mentioned on claim 12.

The closest prior art such as Saji (US patent 5,479,486) teaches a detection circuit within a charging stand that is separate from the cordless handset. Saji teaches in figures 1-2, an indicator notifying the user that charging is being performed is in the charging stand 32, in figure 3 the detecting circuit 38 drives the indicator 34, both lying within the charging stand. Further Saji teaches warning indicator 8, warning buzzer 9, switch 10 and detecting circuit 15 are in the charging stand 6. Saji fails to teach a radio telephone including a recharging power supply as specifically mentioned on claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
